

Heart, Vascular & Vein of Tampa Bay

For Vein Disease Assessment

Patient Name: _____ DOB: _____ Date: _____

Please fill out this self-assessment to see if you might be a candidate for additional screening for varicose veins and/or chronic venous insufficiency. Circle YES or NO for your response.

HISTORY:

Have you ever had varicose veins? YES NO

SIGNS AND SYMPTOMS:

Do you experience any of the following signs and symptoms in your legs or ankles?

Leg pain, aching and cramping? YES NO

Leg or ankle swelling, especially at the end of the day? YES NO

“Heaviness” in your legs? YES NO

Restless legs? YES NO

Skin discoloration or texture changes in the legs? YES NO

Open wounds and sores? YES NO

Do you have spider veins that concern you or need treatment for? YES NO

RISK FACTORS:

Has anyone in your family ever had varicose veins or being diagnosed with Venous reflux disease or chronic venous insufficiency? YES NO

Have you ever had any treatment or procedures for vein problems? YES NO

Do you stand for long periods of time on a daily basis? YES NO

If you answered YES to one or more of the above questions, you feel you need to further work-up or treatment for any of the above, please contact ***Heart, Vascular & Vein of Tampa Bay*** at (813) 755-3500, to be scheduled for a consultation.

If you are seeing any of our physicians for any other cardiovascular issues and would like an opinion/consultation regarding vein concerns, please let that physician know so appropriate follow-up/consultation can be arranged.

We offer injection sclerotherapy, laser sclerotherapy for spider veins and small varicose veins, ambulatory microphlebectomy for larger varicose veins, and Closure Fast Radiofrequency ablation as well as the new advanced Venaseal ablation for superficial reflux disease. In addition, we do comprehensive non-invasive arterial and venous ultrasound testing in our full service non-invasive Vascular Department.

Heart, Vascular & Vein of Tampa Bay has a comprehensive Vein Clinic that can treat any vein disease from spider veins to varicose veins to reflux in our office. We also have a State of the Art laser sclerotherapy treatment program that is ideal for spider veins and small varicose veins. We may occasionally have to treat patients in the hospital to assess for deep venous system disease. Let Heart, Vascular & Vein of Tampa Bay assist you in treating your vein disease.
